JEREMY WOOD

Solutions Architect | Automation & DevOps Specialist

Remote (US) | jeremywood.digital | github.com/magcargoj | Learning Hungarian (Magyar)

THE FORENSIC ADVANTAGE

Elite Technical Specialist focused on **Mobile DevOps Automation** and **Technical Localization**. Expert in reverse-engineering complex software systems and building resilient API-driven workflows. Proven ability to act as a **Trusted Advisor** to enterprise stakeholders, translating complex technical failures into architectural opportunities.

TECHNICAL ARSENAL

Automation & CI: Python, Shell Scripting (Bash), Bitrise CI/CD Workflows

APIs & Protocols: GraphQL, REST, MCP (Model Context Protocol), Webhooks

DevOps Mastery: Forensic Post-Mortems, Infrastructure-as-Code (Logic), GitHub

Localization: Reverse Engineering, Resource Mapping, Magyar Translation

SELECTED FORENSIC PROJECTS

Project: Technical Localization Engine (English to Magyar)

Reverse-engineered a major video game title (*Pikmin*) to implement a full technical localization into Hungarian. Managed complex string resource mappings and character-

encoding constraints, demonstrating deep technical problem-solving in a non-standard environment.

Project: Forensic Vault Distiller (MCP Server)

Architected a custom Python-based MCP server utilizing the **Buffer GraphQL API**. Built a bridge between local technical documentation and automated social distribution, showcasing mastery of modern API integration and AI-driven workflows.

PROFESSIONAL TRAJECTORY

Technical Support & Solutions Lead 2019 – Present

BlueTone Media (Contract/Full-time)

- Acted as the **Technical Escalation Point** for complex integration failures across a global support team.
- Collaborated with Product and Engineering to identify industry trends and improve product roadmaps via forensic data.
- Built deep relationships with technical champions at enterprise accounts, acting as a Subject Matter Expert for DevOps-adjacent challenges.

WHY BITRISE?

I am deeply aligned with Bitrise's mission to "help everyone build better mobile apps." As an active learner of the Hungarian language and a seeker of Hungarian citizenship, I am uniquely motivated to contribute to Bitrise's global success from within the US market.
