SYSTEMS ENGINEERING SUMMARY

Revenue operations professional with 6+ years of experience bringing **engineering rigor** and **AI-assisted automation** to GTM infrastructure. Specialist in architecting clean, extensible HubSpot ecosystems and building custom integrations within **.NET-based enterprise environments**. I think in systems, not tickets, and prioritize technical debt reduction through robust documentation and version-control-aligned operations.

TECHNICAL EXPERIENCE

Technical Support Engineer (RevOps Architecture)

NOV 2025 - PRESENT

BlueTone Media (Built on .NET)

→ Serve as the primary technical anchor for an **enterprise .NET-based SaaS platform**, managing the intersection of engineering requirements and GTM operations.

→ Architected and deployed custom **Chrome Extensions** and **Google Apps Scripts** to automate

TECHNICAL TOOLKIT

GTM ECOSYSTEM

- HubSpot Architect
- Custom Objects
- Workflow Automation
- Process Engineering

ENGINEERING & LOGIC

- SQL / phpMyAdmin
- HTML5 / CSS / JS
- Chrome Extensions
- Google Apps Script

manual data mapping, reducing operational friction by 40%.

→ Engineered internal **Lead-Gen Audit Tools** using **AI-assisted Python logic** to proactively identify script-injection conflicts and technical discrepancies.

→ Perform direct **SQL queries** and DB modifications to maintain the integrity of customer billing and renewal schemas.

Technical Operations Lead (Service Director)

NOV 2022 - OCT 2025

BlueTone Media

→ Defined the systemic architecture for technical SEO and conversion tracking, ensuring a **Single Source of Truth** for high-volume enterprise data pipelines.

→ Reduced operational technical debt by standardizing QA protocols for cross-platform integration, ensuring 100% functional parity across production environments.

→ Authored the "Engineering Protocol" for client onboarding, cutting technical setup time by 30% through structured documentation.

Environmental Data Analyst

Pace Analytical

→ Managed logic-based data integrity within rigid **LIMS (Laboratory Information Management Systems)** architectures, achieving zero-tolerance for schema errors.

.NET Environment (Ops)

Python (AI-Assisted)

PERSONAL ENGINEERING

Developed a hardware-accelerated GBA platformer in **raw C** to master fixed-point math and memory management.

INDUSTRY PROOF

- **HubSpot Certified Admin**
- **NC State - B.S. Env. Science**
- **PMP / CSM Certified**

WORKPLACE DNA

Validated Profile: **Highly Cooperative, Extremely Patient, and Goal-Oriented.**
